Experience

Freelance Web Developer (2020 – Present)

Designed custom website for individuals through design thinking and market research

Some Projects can be seen on my website

Russell is a second year Computational Design student studying at University of New South Wales (UNSW) specialising in Front-End Web Development.

Within the first year of studying at UNSW, Russell has already showcased his programming capabilities through serveral projects including conducting Australia's coastal water quality by gathering open data from Australias' Integrated Marine Observation System (IMOS) and the structural analysis and reconstruction of the 'San Antonio de Huertas' designed by Félix Candela in the 1950s

User Experience Consultant (2019 – Present)

Designed ImpacU's official website with focus on targeting university students through many iterations of ideation and prototyping.

Aided the team design and launch of a series of online and in personal programs.

Discipline Delegate (2019 – Present)

Aided in the analysis of UNSW student data in order to deliver a more custom learning experience for University students.

Main focus on student reach, voicing student opinions to make changes on campus on behalf of the University.

Piano Teacher (2018 – Present)

Currently Holds a Certificate of Performance (C-Mus)
